Summary

I have master degree in computer science and more than three years of web development experience. I'm experienced in building and maintaining responsive websites. I possess proficient knowledge on main frontend technologies: JavaScript, React, React Hooks, Redux; Also I know how to work with: CSS preprocessors (SASS/LESS),Bootstrap,FlexBox, Grid, Ajax, npm/yarn, webpack, and Git. For all of my works, I have maintained one common thing, i.e, cleanness. My code is always well structured so that any child can easily follow along with it. Finally, I try to think of the targeted audience and code accordingly by fully understanding the flow and logic.

Experience

Trainee Software Engineer
EPAM Systems
Feb 2023 - Present (11 months)

Student Software Engineer
EPAM Systems
Jan 2022 - Feb 2023 (1 year 2 months)

Frontend Engineer
Фриланс
Jul 2021 - Oct 2021 (4 months)
I took part in a short-term commercial project in the e-commerce domain. My responsibilities included creating markup and writing front-end logic by using React.
The team had 2 FE devs (including me) and 1 BE.
Main technologies used by me: TypeScript, React (with hooks), CSS preprocessor (SCSS), Webpack.

Education

Ternopil State 'Ivan Pul'uj' Technical University
Master's degree, Computer Science

Ternopil State 'Ivan Pul'uj' Technical University
Bachelor's degree, Computer Science

Licenses & Certifications

JavaScript v.2.0 - itgid
3j1pb9j3e1

React. Lite level - itgid
3zy8r1jr8rfq

React JS. Practical Course 2020 (Hooks, Classes, Redux) - Udemy
UC-d322805a-7c86-87e3-3ce0b80f757f

Skills

React.js • JavaScript • ES 6 • Scrum • i18 • Jest • react testing library • Redux Thunk • Jira
• prop-types
